Harold:

I'm enclosing copies of the replies to my Huie request.

On the New Orleans releases, the first (157-10673-1270) should have been released to you from HQ, and if not HQ then from Memphis. The second appears to have been circulated internally at New Orleans only.

Do you have any recollection of having recieved either of them? Did they have these kind of deletions? My recollection is that b2 was almost never used during the MURKIN processing, except perhaps for symbol informants.
